

FLANEL

The softness and visual comfort of coated fabric to enhance your premises.

FLANEL

An amazing textile effect.

FLANEL is an M1-category fireproof coated fabric suitable for seating in community spaces, offices, hospitality and healthcare industry.

Alongside the plain leather-effect designs with varying degrees of grain visibility, such as Ginkgo or Urban, and the Diabolo Club print, FLANEL completes the COTTING collection with this new textile-effect M1-category fireproof product.

FLANEL boasts all the usual technical characteristics of Cotting coated fabrics and is perfectly suited to the intensive exposure expected in institutions frequented by the general public. This range has also been developed in line with environmental concerns and is based on raw materials that are more respectful of both nature and mankind.

The pattern is discreet and can be used any way round, to provide the gentle comfort and warm atmosphere you expect from your interior improvements.

Last but not least, you'll find it's never been simpler to maintain that textile appearance, and perfectly safely too!

And when it comes to your customers' colour themes, you'll be able to satisfy all their wishes from the 17 hues of this fashionable range:

- The sustainable simplicity of the raw materials and natural hues including hemp and bark.
- Misty, sensual tones with suggestive names like Brume, Jade, etc.
- The warmth, power and energy of cosy pigments such as Pitaya, Paon, etc.

APPLICATIONS

- Seating for all premises used by the general public (hotels, restaurants, healthcare establishments, retirement homes, offices, cruise ships, casinos, etc)
- Panelling, bedheads (hotel rooms, cruise ships, etc)
