

# KALYTERA

Indulge in feeling good!

# KALYTERA

## We guarantee quality, functionality and style.

Cotting has been committed to developing a new, innovative range of products particularly suited to the world of health and care. As its Greek name implies, our goal is ensuring that you enjoy the best quality both in terms of functionality and style.

According to the WHO, 3 types of well-being combined (physical, mental and social) are a key factor in enjoying long-term good health. The search for well-being is becoming more holistic and affects all generations.

In response to this need, medical professions are joining forces to offer all-round patient care. Traditional and progressive systems of treatment are starting to consider alternative care therapies, including the practice of sport, art or meditation - all of which contribute to the promise of 'living better for longer'.

Spaces are being designed to be more welcoming and less sanitised. In this way, aesthetic codes are changing and adapting to the new values expected by patients.

## Technical characteristics

- **Fire norms**  
M1 // AM 18 // EN 71-2  
IMO A652 FTP 2010 / Wheelmark  
B2 // Crib 5 // EN 1021. 1-2  
Q2 Önorm B 3825 / A 3800 // Classe 1. IM (UNI 9175)  
ECE R118 R03 (annexes 6 & 8)
- The **Sanitized** treatment provides antibacterial and antiviral properties and is 99% effective on human coronaviruses.  
ISO 21702:2019 & JIS Z 2801: 2000 / ISO 22196
- The **C-VÅRD** finish provides enhanced protection against stains, a natural feel and resistance to soiling and contamination. It is easy to care for using just soapy water.

For KALYTERA, we have focused on 16 colours in particular. These have been divided into 4 themes according to their intended use. The thinking behind this is that colour is the most widely shared and most easily understood universal symbol with which everyone can identify.

**NATURALITY:** a synthesis of well-being and the natural world through the colours of Figue, Muscade, Liège and Thym.

**HORIZON :** a desire for calm and deep breathing fulfilled by Opaline, Ozone, Crépuscule and Calcaire.

**BOLDNESS:** a contrast of atmospheric cool colours and the hot, spicy hues of Paprika, Zéphyr, Citron and Orage.

**SOPHISTICATION:** reassuring dark tones with a subtle sheen of Vert Titien, Ebène, Minuit and Jais.

## APPLICATIONS

- Seating, chairs for all health care facilities
- Chairs and benches for the hotel and catering industry
- Cruise ships

As the world becomes increasingly urbanised, the trend is to associate well-being with nature. In response, material manufacturers are competing with each other creatively by putting forward eco-aesthetic solutions. As a result, there is a strong trend for 'natural Zen' spaces.

**KALYTERA** is part of this current fashion in that it offers a range focusing on natural colours. The warm, comforting hues go perfectly with all environments which emphasise authentic materials.

4 colours which combine well with light colours:

The colour **Figue** is new. It brings an air of sophistication to the more traditional colours in the range and enhances all the other hues.

**Muscade** brings a new twist to the warm tones of wood and leather.

**Liège** is the new must-have, warm neutral shade which will calm or enhance strong colours.

Finally, **Thym** green, a shade of plant-inspired well-being, completes the palette of greens so popular in living spaces.

The desire to take a break and gaze into the distance is growing, much like the craving for calm and deep breathing in order to better reconnect with the elements and earth energies.

The new airy pastels radiate good vibes and a more relaxed way of life. Reassuring and calm, they foster a feeling of optimism.

**Opaline**, mineral purity and a moon-like colour which encourages relaxation and meditation. Ideal for all places dedicated to well-being.

**Ozone**, an inspiring colour somewhere between blue and grey. Soft and energising, this colour is perfect for combing with other shades as it is always enhancing.

**Crépuscule**, a flamboyant orange reflecting the sky at sunset. Used as pops of colour, it warms up more muted hues with its energy.

**Calcaire**, an essential off-white for complementing all colours. It brings a feeling of restraint and a timeless vibe.

An ideal range for creating clear, memorable visual signage and energising spaces.

This contrasting range of cool, atmospheric hues and warm, spicy colours is your solution for defining areas and breaking traditional codes.

**Paprika**, a spicy red which is immediately noticeable but not aggressive. It is perfect for breathing life into a space.

**Zéphyr**, this taupe grey adds a hint of elegance which tempers and enhances the warm colours.

**Citron** yellow brightens all hues and can be used as a pop of colour to make dark or neutral colours more dynamic. It can also be used for an overall look to create an invigorating environment.

**Orage**, a grey blue which creates a contemporary vibe. It can be used to balance the boldness of the warm hues or be toned with « Zéphyr ».

## SOPHISTICATION

Everywhere there is a need for reassurance. More than ever, expertise must be presented in a serious manner to provide reassurance.

The power of this range of dark tones lies in the fact that it is both very modern and very timeless. Its sophisticated vibe and subtle sheen enhance its feeling of quality.

**Vert Titien** refreshes the palette of dark greens. Its charm will appeal to designers and it will fit in with any well-maintained space.

**Ebène**, for a tone-on-tone interplay with dark woods, or in contrast with metal.

**Minuit**, this dark blue has replaced black in the fashion world and is following its success in the world of interior design.

**Jais**, a black which shimmers with an unmistakable contemporary minerality and exudes competence and good taste.
